YOU can improve the experiences and mental health of 2SLGBTQIA+ Students!

How?

When students were asked what they wanted their teachers to know about supporting 2SLGBTQIA+ people, this is what they said:

1. Do not make assumptions about sexuality or gender identities
2. Include 2SLGBTQIA+ people in classroom examples
3. Appreciate the importance of teacher support
4. Understand why silence is harmful
5. Use correct pronouns for them

Schools play a critical role in the mental health of 2SLGBTQIA+ youth!
